

Completely Integrated Maintenance —for Better Continuity

As a leader in innovative industrial, mechanical, electrical, and civil construction solutions, MOR PPM (PPM) also provides full-service plant maintenance and shutdown agreements to help improve continuity.

Your shutdown projects can often be handled within the same agreement, under the same craft billing rate and equipment rate structure, which can help you lower costs. This also helps you focus on your upcoming shutdown, and spend less time on contract management.

Markets Served

- » Pulp and paper
- » Chemical
- » Power generation
- » Mining
- » Food processing
- » General manufacturing
- » Petrochemical
- » Pharmaceutical
- » Tire manufacturing

Award-winning Safety

- » Global pulp and paper manufacturer
(2,000,000 safe work hours/no lost-time injury)
- » Southeast power producer
(Two Triangle Safety Excellence Awards)
- » North Carolina chemical processing facility
(Four years without a recordable injury)
- » U.S. Pulp & Paper Manufacturer
(Ten years without a recordable injury)
- » PPM company record
(5,000,000 safe hours/no lost-time injury)
- » Southeast fine paper manufacturer
(3,000,000 safe work hours/no lost-time injury)
- » Southeast power plant
(3,000,000 safe work hours/no lost-time injury)

Planned for Your Priorities

Our integrated nested maintenance and outage services help enhance your facility's profitability by making the most productive use of on-site equipment and craft workers.

In our nested contracts, we identify maintenance issues that could affect plant availability. Because turnarounds and shutdowns can represent the most significant portion of your plant's yearly maintenance, we'll work with you to outline and plan them based on your priorities.

We then work with plant engineers to set budget and manpower loading plans and develop an integrated schedule.

Reliable from Start to Finish

We can manage the entire shutdown from start to finish, performing mechanical, electrical, and civil repairs and modifications as needed.

We conduct thorough inspections and tests to establish mechanical and electrical (M&E) equipment maintainability, reliability, and availability. Our tooling team loads all the right equipment so when your shutdown starts everything is ready. We offer:

- » On-site facilities maintenance team managers to focus on client communication
- » Installation and repair/replacement of M&E equipment
- » Assistance with the planning and scheduling before and during
- » Outage work varying from one-day machine-specific outages to several-week cold outages
- » Preventive plant maintenance repair
- » Emergency response to equipment breakdowns 24/7/365

What Can We Do for You?
